Summary

Proactive and curious frontend engineering professional with 2+ years of experience building and maintaining responsive web applications. Proficient in React, JavaScript/TypeScript, HTML, and CSS, with a strong focus on frontend best practices, responsive UIs, web performance, and accessibility. Hands-on experience collaborating with designers, product managers, and backend engineers to deliver intuitive end-to-end digital experiences.

Professional Experience

UX Developer - Indeed Inc, Employer organization, remote

September 2022 – May 2024

UX Developer bridging design and engineering to build and maintain enterprise-level frontend features for the Employer Home and Notifications teams. Additionally, supported the Communications Hub project from inception to launch.

- Implemented a high-priority task management solution for enterprise employer admins using ReactJS, TypeScript, and CSS-in-JS, increasing subscription management completion rates by 27.5%.
- Established a reusable UI component framework for the Communications platform using React, React Hooks, and TypeScript, improving the maintainability and scalability of the platform.
- Collaborated with product managers, designers, and engineers to define and deliver impactful end-to-end digital experiences. Participated in user research sessions and brainstormed new design ideas, ensuring a smooth transition from design to development.
- Led UX improvements across 3+ products, aligning with WCAG 2.1 AA standards, through accessibility audits, user flow updates, and tools like Axe, ARC Toolkit, and VoiceOver. Resolved 20+ critical accessibility issues, reducing the a11y backlog by 75% and improving user experience.
- Developed a 5-page campaign creation interface flow, integrating with backend APIs using Apollo Client and GraphQL. Successfully delivered the project on time by closely collaborating with cross-functional peers.
- Advocated for code quality, user experience, consistent branding, and Indeed Design System adoption through code reviews, active collaboration, and teamwork. Ensured adherence to frontend best practices within a fast-paced tech environment.

Frontend Developer - Kaput.am. Game startup, remote

January 2021 – February 2022

Developed a React app for Kaput.am, a startup focused on delivering online gaming experiences.

- Increased user engagement by ~10% through competitive analysis, research, and building new UI components.
- Improved website performance by adopting SEO best practices and refactoring the codebase.
- Collaborated with backend engineers for smooth end-to-end functionality and integration.
