HTML | HTML5 | CSS | CSS3 | JavaScript | React | TypeScript | Node.js | GraphQL | Git | GitHub | GitLab | React Testing Library | Storybook | Jira | Agile

Professional Experience

Indeed Inc, remote   **09/2022 - 05/2024**
Associate UX Developer
- Optimized code quality and usability within multiple product areas, focusing on accessibility (a11y) and resolving broken experiences (FBE), achieving a 75% backlog refinement, and efficiently contributing to Indeed's FBE and a11y company-wide initiative.
- Implemented the new theme support upgrades across dedicated multiple repositories, resulting in bug-free rollouts and successfully meeting organizational goals.
- Drove improvements for UX quality and component architecture for the Communications Hub, delivering a scalable and maintainable internal tool.
- Bridged the gap between design and engineering, effectively collaborating closely with designers, product managers, and engineers to deliver cohesive and user-centric solutions.
- Played a key role in design ideation and decision-making processes, leveraging design and user research insights, resulting in the successful launch of user-centric and responsive frontend features.

Kaput.am. Game startup, remote   **01/2021 - 02/2022**
Frontend Developer
Volunteered to develop a React app for Kaput.am, a startup focused on creating online gaming experiences through its 32-cardboard web app game.
- Achieved a 10% increase in user engagement through competitive analysis, research, and the implementation of new UI elements.

Education

Master of Finance (MFin), Securities Markets
Armenian State University of Economics
